

SEYMOUR DAILY REPUBLICAN

VOLUME XXIX NO. 137

SEYMOUR, INDIANA, THURSDAY, MAY 19, 1910.

PRICE TWO CENTS

HEAVY DOCKET

Many New Cases Filed In Jackson Circuit Court.

The present term of court has been one of the heaviest terms in this county for some time. Besides several important cases which have attracted much attention throughout the county a large number of other cases have been docketed. Most of the new cases, however, will not be ready for trial this term, as it will take several weeks to complete the issues.

Among the new cases which have been filed are:

George A. Robertson, guardian of Sarah E. Robertson and Millard Robertson; ex parte partition.

Edward V. Price & Co. vs. Weithoff & Kernan, of Seymour, on account; demand, \$200.

First National Bank of Brownstown, vs. Arlie D. Flora, on note; demand, \$100.

Frank L. Kruwell vs. Ralph B. Applewhite; to quiet title.

The Starr Piano Co. vs. Edward L. Hancock, on note.

Willard S. Terrell, et al; to quiet title.

Charles W. Spurgeon, administrator of the estate of Ella Joslin, deceased, vs. Arlie D. Flora, et al, on note; demand, \$300.

Mary E. Grider vs. Charles Grider; divorce. They were married November 8, 1900, and separated April 12, 1910. In the complaint the defendant is charged with being an habitual drunkard and failure to provide. The plaintiff asks the custody of their five children.

Amanda C. Brown vs. Able Willis Brown, divorce. The parties were married October 9, 1909 and separated April 10, 1910. When the defendant left his home he stated that he was going to visit his children at Columbus but never returned. The plaintiff alleges that the defendant begged and entreated her to give him the title to her property, and when she refused he acted sullen. She also alleges that he sold several articles which belonged to her personally and never reported the sale and kept the money which he received in payment. She further alleges the defendant has personal property to the value of \$500, and \$2000 cash in hand and banks. In addition to her application for divorce she asks \$100 alimony. It will be remembered that at the same time Mr. Brown disappeared, Mrs. Virgil Jackson of Brownstown, also left home with her two sons under pretext of visiting her parents in Illinois, and failed to return, and the supposition, supported by subsequent events, is that they went away together.

William E. Bash and Ray F. Bash vs. Sarah Peele, account. Demand is made for \$430. The plaintiffs allege that they are real estate dealers, and that they contracted with the defendant for the sale of her farm near Crothersville, known as the "Vernon Place." They found a person to exchange the farm, and submitted a written proposition to the defendant which she accepted, but afterwards refused to sign the deed and close the contract. The plaintiffs say that they were to receive a two per cent. commission amounting to \$430.

Minerva Wallace vs. Zebulon Collins, account; venue from Scott county. The plaintiff is a daughter of the defendant, but is a married woman. She says that at the request of the defendant she and her husband broke up housekeeping and moved in with her father in order to keep house for him for which he was to pay her. She asks for \$252 for her services.

Pearl Stigers, administratrix of the

[Continued on Page 5, Column 4.]

CAUGHT

By Commissioners For Violating Fish and Games Law.

Ulysses Terrell, of Scott county, was caught with two sets of fishing nets in his possession Wednesday, and his trial was put down for Wednesday, June 1, in Squire Crawford's court at Scottsburg. The arrests were made by Deputy Fish and Game Commissioner F. M. Shlers, of Indianapolis, and Jacob Sottong, of Brookville. These men have been working in this part of the state for the past two weeks and they seem to be striking "pay dirt" everywhere they go. The results of their vigilance show that in every vicinity almost there are persons who are taking advantage of the laws for the protection of fish and game, and advantage of those of their neighbors who try to obey the laws, and are trying to reap a big harvest outside of the lawful season, and with any and every kind of paraphernalia.

A young man near Uniontown, who was fishing with a net, paid a fine and costs amounting to \$37. A party in the vicinity of Reddington was arrested while hunting and made his escape from the officers. From here they answered a call at Salem and found Robert Darlington and Ben Lowen hunting and with four squirrels in their possession. They were both arrested and taken before a justice of the peace where they plead guilty and were each given a fine and costs amounting to \$37.25. Now, these same game wardens have turned up in Scott county and by tomorrow we may hear from them anywhere in a dozen counties in this part of the state.

Violators of the law in every direction are being watched and it is only a question of time with anyone who persists in disobeying these statutes when he may expect to find himself within the strong arm of the law.

It is a violation of the law to kill squirrels at this season of the year, or to fish with a seine or net and the law should be obeyed. The state is full of deputy game commissioners, and they are watching for those who violate the law. Better pay twenty cents a pound for bacon or twenty-five cents per pound for ham than \$37.25 apiece for squirrels and similar prices for simply having a fishing net or seine in your possession, whether in use or not.

ANIMAL STORIES.

Brown County People Have Experiences With Snake and Eagles.

Charles Cummings, a young Brown county farmer near Nashville, had a thrilling experience with a large black snake while plowing. He had seen his father take reptiles by the tails and jerk off their heads. While he was plowing he came across one five feet four inches long. Thinking he could do as his father he caught it by the tail and whirled it over his head, but instead of the reptile's head flying off it coiled around his neck. His father who was working in the same field, saw the situation and hurried to him. The snake had strangled the boy until he was black in the face. The father pulled the snake from around his son's neck and jerked off its head.

Jacob Wilkinson, a Brown county farmer, was seriously injured a few days ago by three eagles. He heard his pigs squealing and his chickens flying in every direction, and hurried to the barnyard, where he saw three large eagles attacking his pigs. The birds then attacked Wilkinson. His son hearing his father calling for help, hurried out armed with a shotgun. As the birds flew away he killed one of them. It was the largest eagle ever seen in that county.

CIRCUS HERE

Robinson's Shows "Bigger and Grandeur Than Ever" In Seymour.

Robinson's Famous Shows arrived in this city this morning, over the B. & O. S.W., from Bedford, where they gave two performances yesterday. The show is comparatively new, having been organized but a short time and the owners are advertising some new and unique features which will please the crowd. The company carries a special train of nineteen cars, which are unusually large. The tents have been pitched on West Second street, east of the D'Heur & Swain Lumber Company. The show comes here under the auspice of the local lodge of Elks.

The usual parade, given this morning about 11 o'clock, covered the principal streets. Although the parade was not as long as some which have been seen in this city and did not have the variety of features characteristic of the big shows, it was very good and seemed to please the large number of people who saw it.

One of the special features of the Robinson shows this year is the trained animal acts. The owners of the show guarantee that the public will be pleased with their trained wild animals, which perform in a steel arena. The leopards with their trainer were exhibited in the parade this morning. The company also has two elephants and two camels, besides a number of smaller animals.

Another feature in connection with the show which is of interest is the special police force. Mayor Swope, realizing the importance of adequate police protection, swore in a number of local Elks who are serving as special police at the grounds today. Jack Shiel is captain of the special police squad, Nathan Kaufman is chief detective and Judge John M. Lewis is superintendent of the special force. It is understood that the members of the regular force are on the grounds to assist in any emergency which might arise and to protect the special policemen from danger.

Regarding the show, which performed at Washington Tuesday, the Herald of that city says:

"The show was good; it was far above the average for such a traveling aggregation. Many of the acts were new. The trapeze, rings, bars, riders and tumblers were entertaining, but were nothing out of the ordinary. The wire workers and balancers were good and performed difficult feats that brought from the crowd round after round of applause. The animal stunts pulled off within an inclosed cage was beyond doubt the best ever given in this city, while the trained dogs cut many amusing capers."

Benj. Robinson, of the show company, said this afternoon that the company has experienced very unfavorable weather this year. They opened the summer season at Chattanooga several weeks ago in a snow storm, and since that time they had had but one other clear day before they came to Seymour. In spite of the unfavorable weather, however, he said that they had had fine crowds and had enjoyed an excellent business.

Wreck Results in Suit.

Dr. James H. Sale, aged sixty-five, a physician of Lawrenceburg, has filed a complaint for \$15,000 damages against the Baltimore & Ohio Southwestern, alleging he received injuries in one of the recent wrecks near Flora, Ill.

Country Club.

The May committee of the County Club will entertain for the ladies of the club Saturday afternoon at 2:30 o'clock at the club house.

ABOUT KANSAS

Cash Kern, Formerly of this County Writes An Interesting Letter.

TO THE EDITOR:

For the past two months I have been traveling in Kansas, and having been born and reared in Jackson County, I would like to speak through the columns of your paper, to friends there, many of whom were my pupils in the public schools, telling them how Kansas looks to a Hoosier. Fifteen to twenty years ago such names as "Starving Kansas" and "Droughty Kansas" were applied and probably not without just cause to the state. But the past ten years have brought a wonderful change. Farmers proudly say, "Our State stands first in the production of wheat and alfalfa." Wheat is the staple crop in the dryer western portion while alfalfa and corn are the leaders in the eastern part of the state.

The State, one time a vast prairie, is now many splendid farms each with its cluster of trees, and promising fields that make the life of the Kansas farmer one to be envied.

The past winter has been unusually severe and followed by a dry spring has greatly injured the wheat crop. F. D. Coburn, the famous authority on agriculture, says the wheat is damaged 24 per cent. of the average, still since the spring rains have come the farmers seem to have forgotten the wheat damage and expect a "bumper crop" yet.

The Kansas farmer loves to drive an auto. Automobiles are not held as luxuries of the favored few, but like the telephone are fast becoming one of the farmer's necessities.

I have visited a great many of the state and national institutions within the state. An experimental farm and the western branch of the State Normal are located at Hays City. The Mother Bickerdyke Home, a home for the soldiers' widows and army nurses is near Ellsworth. The Girls' Industrial School is at Beloit.

Ft. Riley, a military post, second only to Ft. Leavenworth, is located near Junction City. The agricultural college at Manhattan is the most famous college of its kind in the United States.

Kansas City, although the greater part of the city is located in Missouri, is really the metropolis of Kansas. The "Kansas City Star" the greatest paper in the west, is a booster for Kansas. This paper takes far more interest in Kansas politics than those of Missouri, although the paper is published in Missouri.

Kansas City has the finest system of parks and boulevards that I have ever seen in any city. And to show the American spirit and freedom of the city there is not one sign that says, "Keep off the grass." Yours truly, CASH KERN.

HIT BY TRACTION CAR.

William Simpson Painfully Injured In Accident North of Seymour.

William Simpson, a farm hand employed by John Beatty, was painfully hurt near the Beatty home Tuesday evening when he was struck by a south bound freight car on the Indianapolis, Columbus & Southern Traction Company tracks. He was bruised about the back but no bones were broken.

Simpson was in charge of a farm wagon on team and was walking beside the horses. A regular passenger car had just passed, going south, and the freight was following. Simpson drove the team onto the track just as the car struck him. The wagon was loaded with two plows and it was demolished and the plows thrown several feet. The animals escaped with a few bruises.

NO CLEW

To Henryville Robbery Given By Parties Under Suspicion.

The officers who are working on the Henryville postoffice robbery believed that they had a clew to the robbers Wednesday evening, but an investigation showed that the parties who were under suspicion were in no way connected with the robbery. The local officers and the secret service men, who are watching each car on the Indianapolis & Louisville Traction line, noticed two men get off a north bound car at Sellersburg. The parties acted as if they were waiting for some one, and the officers watched them carefully. The men were at the interurban station when the next north bound car came in, and met a young lady. All three of the parties were immediately taken into custody by the officers, but maintained that they were not guilty of any wrong doing.

The woman, from her talk and manner showed that she had been before the police authorities before and did not seem the least embarrassed by the arrest. When the officer attempted to take her to jail, she told him he had better let her alone as she had "just knocked one cop down a stairway" before she left Louisville. The Sellersburg officer informed her that kind of talk "didn't go" there and no further difficulty was experienced.

The woman and the two men were questioned closely and were able to prove to the officers that they knew nothing whatever of the robbery. They said they were on their way to Indianapolis, and that it was agreed that the girl should meet the men at Sellersburg. The officers released the parties when they were satisfied that they knew nothing about the Henryville affair and they came on to Seymour on the next car. Here they took a north bound car to Indianapolis.

It is said that one of the men who is connected with the robberies at Scottsburg and Henryville has a deformed hand, and close watch is being made for a man of this description. It is understood that a woman, who appeared to be a man in disguise, was seen in the vicinity of Sellersburg Wednesday afternoon, and that the party attempted to conceal her left hand, which was deformed the same as that of the robber. A number of people near Sellersburg believe that this person is connected with the robbery in some manner as there is no man or woman answering such a description known near that town. It is thought that the guilty parties are still in that vicinity and are watching the actions of the officers. It is the general opinion that the two robberies were committed by the same parties.

May Buy Another Show.

W. P. Rooney, of this city is in receipt of a clipping from a Peru paper stating that B. E. Wallace, owner of the Wallace circus, may buy the show and equipment of the Norris & Rowe Company. The latter company broke up in Kentucky and a suit was filed against the owners for \$30,000 alleged to be due from the circus for paper. J. P. Fagan, traffic manager of the Wallace shows, has been with the Norris & Rowe Company for several days and took charge of the property and took it to Peru. It is understood that Wallace will make formal transaction within a day or two whereby he will come in legal control of the property.

REPORT

Of Indiana Reformatory Shows Some Interesting Facts.

The annual report of the Board of Trustees and the General Superintendent of the Indiana reformatory at Jeffersonville for the year 1909 has been printed and is now being circulated. It shows a decrease in the population which is interesting to contemplate. Either the decrease in the amount of intoxicants consumed since the local option law has been put into force is having a good effect or the amount of crime has been decreased from some other source, or else the police authorities and other executive officers have not been as active in enforcing the law. At any rate, it is forth while to give the matter some consideration.

If there has been legislation of some kind that has reduced the amount of crime it is conceded that it would be the part of wisdom for the people to determine what such legislation is and to foster and promote other legislation of a similar kind.

Out of the four hundred prisoners committed during the fiscal year ending September 30, 1909, sixty were from Marion county; twenty-five from Vigo, thirteen from Lake, twelve from Allen, etc. Most of the counties running as high as ten or more commitments during the year are "wet" counties. On the other hand, twenty-four counties of the state did not send a single prisoner to the Indiana reformatory during the year and most of these twenty-four counties are "dry". These conditions certainly do not strengthen the argument that moral conditions are worse without saloons than they are with them.

About ten per cent. of those committed could not read nor write and most of them had never reached even the fourth grade work in the public schools. Considerably more than half the four hundred were moderate drinkers and fifty-three, or more than thirteen per cent, drank to excess. Again, much more than half the total number of persons committed were not members of any church.

Five prisoners were committed from Jackson county during the period included in the report, which was more than our proportion and considerably more when our population is taken into consideration.

The number committed during the year was considerably below the average for a period running back thirteen years. The report also contains a considerable amount of interesting statistics concerning the hospital and school. Altogether there are several things that show that the general spirit in Indiana is in favor of reforming prisoners and starting them out with an education and a trade.

Theatre Improved.

The proprietors of the Rustic electric show have made a decided improvement in their theatre, on West Second street. About half of the seats in the room have been elevated, thus making it possible for the patrons who are seated in the rear of the room to get as good a view of the curtain as those who are nearer the front. Heretofore the seats were placed on the same level and it was difficult for the entire audience to see the pictures as they were thrown upon the canvas. The Rustic has been giving some very interesting pictures since they opened several weeks ago, and have been receiving their share of the public patronage.

The charter of the Pocahontas council closes Saturday night. If you want to get in as a charter member see Dr. B. S. Shinness before that time.

Hoadley Grocery

A Fashion Chat on the Separate Blouse.

Furnished by Pictorial Review
853 Broadway, New York City.

The separate blouse has pushed its way into favor again and when we consider the newest models of silks, chailie, or of the more expensive combinations of lace and chiffon in all their beauty and charm, there is little doubt concerning their justified claims for our attention.

They are so eminently convenient that our women in general have clung to them for morning and afternoon wear and as the French have welcomed the separate blouse, it will undoubtedly increase their popularity.

Not only are this season's blouses beautiful in design and texture but excellent opportunities are afforded for clever manipulation of combinations of two or more materials. Here is a chance for the woman who has a bodice left over from last year.

When we say that the waists are beautiful we do not necessarily mean they are lavishly trimmed with embroideries, laces and frills or decorated with massive braided designs or coarse work. The beauty lies in their simplicity. Trimmings of the above character are used of course but in a moderate way. A more effective and smarter result is obtained when less garniture is used.

The first PICTORIAL REVIEW MODEL No. 3105 is one of the favorite combination blouses. The bodice and sleeve caps are made of blue chiffon while the yoke and under sleeves are of cream colored hand tucked net. The bodice is lined with silk to match. It comes in sizes 32, 34, 36, 38 and 40 inches bust measure and can have low neck or short sleeves which are extremely fashionable features of both waists and gowns.

The second model, PICTORIAL REVIEW PATTERN of which is No. 2941 is made of soft satin and broadcloth, braided in a simple and effective design. It is more elaborate than the first model but refinement is stamped on every line. A separate guilpe can be worn with this waist as well as with the former. Sizes are 32, 34, 36, 38 and 40 inches bust measure. Size 36 requires 2 1/2 yards of 36-inch material with 3/4 yard of 27-inch material for girdle and bow.

Crossed lines, so successful in many of the gowns this season have been used in this form. A black tulle is made over lovely sapphire blue silk. Bands of black lace, heavily embroidered with jet and sapphire beads, rise from the back waist line and cross in the front. Tucks, not too many, add more beauty but not expense.

PICTORIAL REVIEW PATTERN No. 2989 is a charming model. Very little trimming is required for this blouse. The particular style of it does not call for much more than a material that is rich in quality. It is in surplus style and comes in sizes 32, 34, 36, 38 and 40 inches bust measure. A medium size requires 2 1/2 yards of 36-inch material.

Patterns for the above blouses including cutting and construction guides are 15 cents each number.

That Necessary Magazine

—for the thinking man—for the professional man—
for the busy business man—and his
family; in short, it's for **You**

25 cents
per copy

\$3.00
a year

The Review of Reviews

first, because it is a necessity—that is the rule in magazine buying of America's intellectual aristocracy. It is indispensable to the busy business man, who must keep abreast of the times, because it gives him the *real news* of the day in concise, readable form; it is invaluable to the thinking man, who demands only the *truth* and then draws his own conclusions, because it gives him just *plain, straight facts*.

It is helpful to the whole family. In it you will find a monthly picture

of men and affairs by Dr. Albert Shaw, in his comprehensive editorial, "Progress of the World," a clever cartoon history of the month; book reviews; the gist of the best which has appeared in the other magazines and newspapers of the world; pithy character sketches; and interesting articles on the all-important topics of the day. Authoritative, non-partisan, timely and very much to the point, "it's a liberal education," is the way subscribers express it.

OUR 1909-10 CATALOGUE

of all American magazines is a money-saver. You can't afford to order for next year without first seeing it. If you appreciate superior agency service, and demand maximum magazine value for the fewest dollars, write for it—today. It's free to YOU.

HENRY A. BARNHART

Indiana Congressman Who De-
nounces the Party "Machine."

RAPS PARTY MACHINES

Representative Barnhart Puts Patriotism Above Party.

Washington, May 17.—Representative Barnhart of Indiana Monday afternoon in the house, speaking of partisanship, said he favored parties, but not machines. "I believe," he said, "that the day is here when the patriotic spirit of the country is such that chosen representatives of the people in all positions of trust from the highest to the lowest, are honor-bound to be faithful to the interest of public welfare rather than subservient to the crack of any party lash."

BOLD HUNTER OF CRIMINALS.

Methods Used by Thomas F. Byrnes to Convict a Murderer.

Probably no man was better known in the world of police and none more feared in the underworld than was Thomas F. Byrnes, formerly superintendent of police and head of the detective department in New York, who recently died at his home in that city.

Courage, shrewdness and persistence advanced him from the ranks as a policeman to the head of the department and gave to him international fame as a bold and successful hunter of criminals. He it was who made Mulberry street the peer of Scotland Yard and spread the fame of his creations, "the dead line" and "the third degree," to the four quarters of the earth.

In his methods there was nothing of the Vidocq, but he had traits which the detective of fiction lacked. His own story of how he got the evidence to convict young Michael E. McGloin of the murder of a Frenchman in New York shows how he effected what appeared to be impossible.

"I knew he committed that murder," said Byrnes, "but how to prove it was the question. I even hired a woman to keep him company for six weeks, and she would have lost an arm before she would have given him away if she had known what I wanted him for. But all she had to do was to keep me informed as to what he was doing, where he went and whom he associated with. At last, in desperation, I played my last card. I had him arrested, and I arrested his three accomplices, each being taken separately and all kept apart. I took McGloin into a little room looking out on the central court of the headquarters building, and I seated him so that he was facing the window and could see what went on in the courtyard. I sat facing him with my back toward the window.

"All around the room were nooses of hangmen's ropes, black jacks and other things associated with crime and punishments. I kept him there forty-five minutes, and at the end of each fifteen minutes one after another of his accomplices was taken across the courtyard as if he had just been arrested. Not a word was said by me. He kept asking me what I wanted of him and what he had done. As each of the first two of his accomplices was brought in I could see him start. Then a pawnbroker came into the room and handed me the pistol with which the murder was done. The pawnbroker went out, and I sat there playing with the pistol. Just then Banfield, the last of the accomplices, was brought through the yard handcuffed to a detective. McGloin dropped to his knees in agony of terror and begged me to save him from the gallows."

Ants That Strike.

Certain kinds of black ants have little yellow ants which do most of their work for them. Once in awhile these little yellow fellows will go on strike, and the blacks try to force them back to work by cutting off their food supply. If that does not succeed, they will attack the strikers in force or make a raid and get another gang of yellows into the colony. But the newcomers, as a rule, join the strikers. The strike ends by the yellows escaping and founding a colony for themselves, or they give in and settle down to work again.

THE KERN CHARGES

Demand Is Growing That They Be
Pushed to Logical Conclusion.

[Special Correspondence.]

Indianapolis, May 17.—Clarence F. Bicknell, editor of the Fort Wayne News, has been in Indianapolis for a day or two with the Nobles of the Mystic Shrine. While here Mr. Bicknell, who formerly was Republican district chairman in the Twelfth district, paid his respects to State Chairman E. M. Lee and the state Republican organization. Mr. Bicknell says that the Twelfth district is getting ready to elect a Republican congressman, and that Senator Beveridge will receive strong support from the legislators who are to be chosen in the counties of the Twelfth. "We are all for Senator Beveridge. Personally, I feel that it would be a serious if not a calamitous thing to send a Kern in place of Senator Beveridge. We believe that things political look much better in Indiana for Republicans than they did before the Democratic state convention, for the reason that the senatorial matter divided the Democrats seriously. Where they might have had ten candidates for United States senator, each gathering his force about him in his own district and exerting a positive influence on the legislative elections in his own section, the Democrats now have but one senatorial aspirant, and he has discredited himself with thinking people by denouncing Democratic caucus betrayal, while failing to follow his charges to their logical and inevitable conclusion. I do not look on John Worth Kern as senatorial timber. He either is insincere and a gossip, or he is a moral coward in politics. Amiable he may be, but we need more than amiability in the United States senate these days."

Mr. Bicknell went on to point out the fact that his newspaper, the always virile and brilliant Fort Wayne News, was alone in its effort to give serious and proper weight to Kern's bribery charges when Mr. Kern first made them. "We urged at the time, and since have urged, that Mr. Kern's name and personality gave his accusations great weight; that it was due the state; that it was due Mr. Kern; that it was due Senator Shively, and due the Democratic members of the Indiana legislature, that such charges as were made by Mr. Kern should be sifted and investigated and proved either false or true. There was no politics in our demand for a complete investigation then. There is no politics in such a demand at this time. We feel that Governor Marshall, with his often stated abhorrence of graft and bribery and fraud, ought to take official cognizance of such a situation as was presented through the interview given to the press by Mr. Kern. I do not know what the governor thinks of the situation, and I do not know that he will act in the matter. But it seems to me that there ought to be action. As has been said, the grand jury of Marion county ought to call Mr. Kern in and catechise him, in order that he may tell in its proper place all he knows about persons being 'bought up' and alienated from his standard in the Democratic legislative caucus of 1909. While Mr. Kern is silent, the Democratic prosecutor is inactive and the Democratic governor ignores the whole scandalous mess, while Senator Shively refuses to denounce his defamer or defend himself against calumny, the voters of Indiana are calmly and quietly taking the measures of this delectable group of Democratic politicians. And the people will have them fairly sized up by next November. The vote for Beveridge will show pretty well what the people think."

Word comes from Washington, D. C., that the Shively boom for president is getting ready to be launched. Senator Shively is being mentioned frequently at the nation's capital as a presidential possibility. It has been known for a good while that Senator Shively's friends were inclined to believe Governor Marshall and to push forward the Democratic member of the upper house as the better presidential proposition of the two. That explains several puzzling matters. For instance, realizing that Senator Shively is an aspirant for the Democratic presidential nomination, and that he does not look on Governor Marshall as a "logical" choice for that large honor, one can imagine why it was that the resolutions of the recent Democratic state convention did not carry a presidential boom for Governor Marshall. Senator Shively was on the ground to see that no such indorsement crept in. And though it had been written into the resolutions, the said Marshall indorsement was erased or blue-penciled by the Shively-Taggart men on the resolutions committee. Democrats in Indiana find that it is awkward to have two presidential potentialities within the state, each fighting the other. They find it is awkward also to have a John Worth Kern inside the organization, to blurt the party's tricks and to expose the frauds and frailties of bosses. Whether it is complimentary to Mr. Kern or not, it may be said for the Shively-Taggart crowd of bosses that they have found an effective way to stop Kern's bawling. And in addition they have been lucky in corking the Marshall presidential boom.

A Strange Disease.

Mexico, May 17.—A strange disease is rapidly killing off the population of the town of Ahuejuko, state of Jalisco. The deaths average ten a day. The sickness lasts only a few hours and always results fatally.

REV. CHARLES F. AKED

Rockefeller Pastor, Who Is
Ill With Typhoid Fever.

REV. C. F. AKED
UNDERWOOD & UNDERWOOD

New York, May 16.—The Rev. Charles F. Aked, pastor of the Fifth Avenue Baptist church, who is ill of typhoid fever at his home, 1 West Eighth-street, is reported to be resting comfortably, with every prospect of recovery.

SENATE REGULARS
CRYING FOR HELP

Carrying On Negotiations With
The Democrats.

Washington, May 18.—Many senators believed, when the senate adjourned Monday night, there was a fair prospect for an agreement by which the passage of the administration railway bill might be expedited, but all efforts yesterday along this line failed. The Republican regulars in the senate invited the insurgents to join them in a conference late in the afternoon, but the insurgents declined, giving as their reason that at the White House confab on Saturday night President Taft and certain senators had made disparaging remarks concerning the radicals. The dissenters served notice that they would not meet the regular Republicans in conference in the future.

Having failed to reach an understanding with their party associates, the Republican senators turned to the Democrats and are now carrying on negotiations with them through Senators Bailey, Hughes and Bacon. The Democratic leaders have intimated that if the senators in charge of the bill will drop the last three sections relating to stocks and bonds and permit a vote on the pending statehood bill, the Democrats will come to their assistance and furnish the necessary votes to table all pending amendments and to pass the bill.

BADER REARRESTED

Indiana Bridge Man Again Finds Himself in Trouble.

Winamac, Ind., May 18.—Clinton L. Bader, general manager of the Winamac Bridge company, was arrested in this city on six indictments returned by the Jasper county grand jury, and an affidavit by the prosecutor of the same county. The indictments and the affidavit were based on new developments in the so-called bridge grafting case. Bader was released on a bond of \$2,100. Bader was recently convicted of grafting in connection with bridge work in Jasper county and released on parole by Governor Marshall before being taken to the penitentiary.

Neckwear For Stout Women.

Choosing suitable neckwear, especially in warm weather, is a difficult task for elderly women.

Stout women, for instance, often experience much discomfort with only the slightest covering or pressure about the neck, and frequently the necessarily high collar worn by the thin type brings the same annoyance.

If the stout woman, however, would look her best she must eschew these soft, duffy effects and finish the neck-piece with a pretty brooch, a single tab of lace, a tiny bow of silk in a delicate color or an equally small bow of dainty lingerie, choosing whichever she considers is "her style" and of course with the thought of how it will harmonize with the waist it is to adorn.

For instance, a waist that is buttoned in the back should not be decorated with a jabot that hangs down the front, but instead a small bow or tab should be worn.

Ben-Hur Convention.

Crawfordsville, Ind., May 18.—The seventh biennial congress of the supreme tribe of Ben-Hur is in session here with an attendance of 400.

AUTO HOOD HAS BECOME
A THING OF BEAUTY.

THE automobile hood is no longer a thing of utility merely. It is a thing of beauty made of the most delicate fabrics. There is a new straw made which imitates lace closely, and this is sewed in shirred rows to make the most coquettish bonnet imaginable. A rose on one side completes the dainty effect.

Floral Dinner Souvenirs.

At dinners recently floral souvenirs in the shape of rosebuds have been the fad. These rosebuds are arranged and wired to look like a small flowering tree. They are placed in tiny china tubs and the stems packed around with artificial moss, thus giving the effect of growing plants.

Tiny Japanese gardens are also all the rage. They are complete in every respect, with temples, grottoes, miniature waterfalls and goldfish, while small china Japanese dolls sit under the miniature trees and sip cups of tea.

The Japanese garden may be said to be the dolls' house of the grownup woman. She can buy all sorts of tiny ornaments for it and improve it in countless ways to her heart's content. The women who own these charming miniature landscapes vie with each other to produce original effects.

Not Afraid of Anything.

The woman of the future is to be afraid of nothing, not even mice or snakes. Classes in natural history are

"I'M NOT AFRAID!"

being formed in the public schools, and the pupils are encouraged to make pets of mice and play with the harmless species of snake, as the little girl in the picture is doing. The day will come if this continues when the old joke about the woman and the mouse will be as extinct as the dodo.

Primped Herself in a Car.

The fashionable woman now carries a dozen little gilt accessories swinging from her waist. These are as varied in their uses as the different articles on her toilet table are, and she does not hesitate to make use of them in public, either.

The other day a well dressed woman riding in a crowded car pulled out a tiny mirror and examined her face critically; then from another receptacle she produced a tiny powder puff, with which she liberally dusted her nose, and still another glittering ornament proved to be a pencil, with which she daintily accented her eyebrows. Her toilet finished, she leaned back with every evidence of satisfaction and a supreme disregard for the onlookers.

MAUD ROBINSON.

GOOD FOR LITTLE GIRLS.

Linen Picture Books to Be Embroidered an Interesting Toy.

The mother with a nursery wants to get those linen picture books that are to be embroidered.

Sheets of linen are folded in such a way that they need only to be stitched on one side. The ends are turned back and stitched down, or the book may be bound with white or colored linen tape. On the different pages are appropriate figures and letters to be worked in outline stitch in mercerized cottons.

Use a heavy cotton and the gayest possible colors that will wash. The larger figures can be done in long and short stitch.

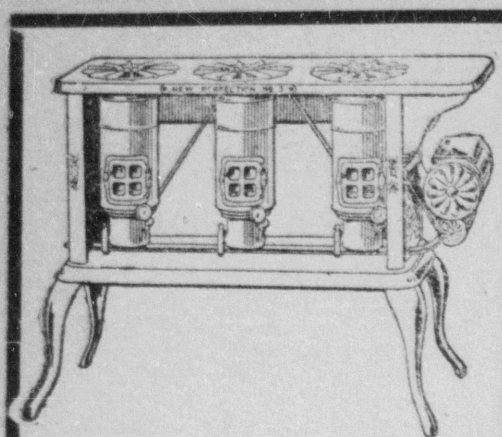

Such a book will not tear, may be made vivid enough to catch a child's fancy and will launder well.

The girl who can draw may originate designs on linen for it. Cut into strips eight or ten inches long and fold like a fan into five inch folds. Stitch at back through all these folds after the outlining is worked. The embroidery is done on both sides. This does away with hemming each separate sheet of book.

How to Make and Keep Friends.

Some natures are more capable of easily forming friendships than others. Real friends are scarce, and once a real friend is found he or she is worth keeping. Acquaintanceship is the apprenticeship of true friends, but many acquaintances can never become anything else. The balance of friendship finds them wanting.

The best way to retain a friend is never to interfere in family or business privacy. Don't presume on liking or affection to impose on your friend's time or arrangements. Always give and take. Your peculiarities are probably as disagreeable to your friend as his or hers are to you. Endure them and so avoid bickerings.

Make Your Kitchen Comfortable

By using the new Perfection Oil Stove. We have them in two sizes and three styles,—plain, with back, and with back and oven. These stoves deliver the heat where you want it. Can be lighted instantly and turned high, low or medium according to the amount of heat required. Call at our store and see them.

RAILROAD NOTES.

The B. & O. S-W. passenger station has been repainted.

D. C. Ward, trainmaster on the I. & L. traction line, was here from Scottsburg this morning and went north on the I. C. & S.

Daniel Willard, president of the Baltimore & Ohio railroad, yesterday was elected president of the American Railway Association at the annual meeting of the association at New York.

The reorganization committee, elected by committees representing the Southern Indiana first mortgage bondholders, the Southern Indiana general mortgage bondholders and the Chicago Southern first mortgage bondholders, consists of the chairman of the respective committees, namely, E. K. Boisot, A. G. Hodonpyl and C. D. Smither and M. E. Johnson, of Cleveland.

The Baltimore & Ohio railroad announced Tuesday that it was in the market for 1,000 all-steel gondola cars, the order to be rushed. All car-makers were asked to send estimates on these cars and also to specify the shortest possible time in which they can build them. In this connection it is stated the Pressed Steel Car Company has received an order for 118 all-steel passenger cars from the Argentine Government railway, being the first order of that kind ever placed in Pittsburgh.

MARRIED.

Basil Young, son of Mr. and Mrs. E. M. Young, of South Chestnut street, was married today to Miss Holstein Stipp, of Rogersville, Tennessee, a young lady whom he met while he was in the south spending several months with his grandfather and other relatives. They will leave for Seymour shortly after the ceremony and are expected here some time Friday. They will make their home here with his parents for the present and later expect to locate in Indianapolis for future residence.

DAMAGE SUIT.

Case of Mrs. Nellie Blythe Against B. & O. S-W. Continued Until May Term.

The damage case of Mrs. Nellie Blythe against the B. & O. S-W. Railway Company, for alleged injuries received while boarding a passenger train at Medora, which had been set for Wednesday in the Lawrence Circuit Court, was continued until May 26. The continuance was due to the absence of two important witnesses.

Mrs. Blythe alleges that she was permanently injured in back, spine, abdomen and arms, and asks for \$15,000 damages.

ASTRONOMERS DIAGREE.

Earth Has Not Yet Passed Through Tail of Comet, Some Declare.

Maybe we did and maybe we didn't. At any rate the astronomers are unable to agree whether the earth passed through the tail of the comet last night, and now some even declare that we may not pass through it at all. Last night astronomers at a number of observatories announced that the worst was over, and just about the time we were becoming convinced that there was no danger, other astronomers asserted that the prophecies were a day early, and that the earth would not be plunged into the poisonous gases until some time today or this evening.

Prof. Asaph Hall, of the naval observatory at Washington, said at four o'clock this morning that the earth would not pass through the tail of Halley's comet until some time today.

According to Dr. Campbell, of the Lick observatory at San Jose, Cal., there is a possibility that the earth may not pass through the comet's tail after all. In a statements issued earlier today he said: "The tail was visible as soon as the moon set. It is probable that we shall miss passing through the tail to-night because it is lagging by several million miles. The comet's orbit is inclined to an angle with the earth's orbit and it is probable we shall not pass through the tail at all."

The failure of the earth to enter the comet's tail on schedule time, it is said, was due to the fact that the tail had developed a pronounced curve, and it was long after sunup in this section of the country before the passage of the earth through the comet's appendage.

Comet Party.

Miss Marguerite Miller entertained a number of her young friends Wednesday evening at a comet party at her home on West Second street. The young ladies had a variety of new and novel entertainments and a chafing dish lunch was served about midnight. Of course, one of the features of the evening was the star gazing. The young ladies were out early this morning to see the circus unload. Those in the party were Misses Marguerite Miller, Lora Reynolds, Lois Reynolds, Luella Toms and Ethel Rottman.

Returned Missionary.

Mrs. Miller, a returned missionary from Korea, will lecture in the Presbyterian church Friday evening, May 21, at 8 o'clock. The public generally is invited, and especially the missionary societies of the other churches.

JOHN HARDIN.

THE COMET'S TAIL

Its Contact With the Earth Produced Brilliant Auroral Lights.

Chicago, May 19.—A message from the Yerkes observatory at Williams Bay reports that the comet's tail hit the earth for the first time at about 9:30 o'clock last night with brilliant auroral lights.

The scientists assembled at the observatory secured excellent photographs of the lights. Prof. Mitchell of Columbia university declared the lights were the direct result of the comet. Three sun-spots, considerably accentuated, were observed by astronomers at the Yerkes observatory at 4 o'clock yesterday afternoon.

Thousands of Chicagoans paid no attention to the reassurances of the scientists, but passed the day in dread of what the night might bring. Even while they were rejecting the theory that the cyanogen gas in the comet's tail would have an evil effect on all life on the earth, they were concerned with other possible effects. At the Yerkes observatory elaborate arrangements had been made for observation of all phenomena in the sky. An open-air battery of telescopes had been set on the lawn of the observatory, and in addition to these all the telescopes there were leveled on the sky. Fourteen telescopes and sixteen cameras were trained skyward, with distinguished scientists and their assistants ready to note the phenomena of the celestial visitor.

THEY NEEDED MONEY

And Credulous Bachelors Were Found to Be Willing Victims.

Indianapolis, May 19.—Garnet Lancaster, who entered a plea of not guilty in federal court to the charge of using the mails in furtherance of a scheme to defraud, changed her mind and changed her plea to guilty. She was taken before Judge A. B. Anderson and sentenced to serve six months in the county jail. Her mother, Violet Lancaster, has also entered a plea of guilty, but has not yet been sentenced. The two women had obtained money from men in various parts of the country by entering into correspondence with them and pretending they wished to marry them, but needed money for apparel, railroad fare or some other purpose.

BIG CONVENTION.

Sunday School Workers of the World Assemble at Washington.

Mrs. M. E. Baker and Mrs. M. C. Carpenter of this city, left for Washington, D. C. Wednesday evening where they will attend the world's sixth Sunday School convention as delegates from Indiana. The Indiana delegates, of which there are sixty six, joined the representatives from Ohio at Cincinnati and took a special train to Washington. On the Indiana division of the train there were nearly one hundred Hoosiers en route to the convention.

The interest of the Indiana delegation outside of the work of the convention is centered in the monster parade scheduled for Friday. The strength of the men's classes of each state is expected to be shown in this parade and besides the delegates from Indiana the Indiana society, composed of Hoosiers living in Washington, are expected to join the parade and make the showing one of the best of any state or country.

The opening session of the convention was held this afternoon. More than fifty nations will be represented.

SCHOOLS RECOMMISSIONED.

Work Here Commended by Dr. W. L. Bryan, of State Board.

Prof. J. A. Linke, superintendent of the public schools, has received the certificate of commission for the local high school from the State Board of Education. The commission permits any graduate from the Seymour high school to enter any college in the state with the standing of Freshman without first passing an examination.

Dr. W. L. Bryan, president of the State University, and a member of the State Board of Education, was here several weeks ago and inspected the work of the schools. He commended the work here very highly and later wrote Superintendent Linke that he was greatly pleased with the manner in which the schools were conducted. In his letter he made special mention of the excellent work of several of the high school instructors and said Seymour was, indeed, fortunate in having such a strong faculty.

It has long been recognized that the schools here were conducted according to the most advanced educational methods, and that the entire corps of teachers was far above the average. With the advantages of the new school building, which has been a necessity for many years, and the excellent management of Professor Linke, the schools will make a greater advancement than ever before, and will take a rank second to none in the state in cities of this class.

Try a Want Ad in The REPUBLICAN

SHOULD NEVER CLOSE.

State Superintendent Believes Schools Should Have Continuous Sessions.

Sessions of school all the year around would be a good thing, especially in the crowded districts, according to Robert J. Ale, state superintendent of public instruction. However, he does not favor compulsory education throughout the year, but believes that the schoolhouses should be open to those who desire to take advantage of the opportunity to attend school during the time in which

the doors are closed under our present system.

He points out that especially in the cities there are many children whose parents have difficulty in finding something for them to do or in caring for them during the vacation period. In this connection he commends the school play ground as a device for keeping the child out of mischief and in giving it a chance to have their recreation in a beneficial way. That the teachers would not object to increased length of the term is the opinion of the state superintendent.

You Can Have a Model Kitchen

as cool and white as a dairy. No smell, no smoke, no heat, no dust. No old-fashioned contrivances. The

New Perfection WICK BLUE FLAME Oil Cook-stove

Is the latest practical, scientific cook-stove. It will cook the most elaborate dinner without heating the kitchen.

Boils, bakes, or roasts better than any range. Ready in a second. Extinguished in a second. Fitted with Cabinet Top, with collapsible

rests, towel rack, and every up-to-date feature imaginable. You want it, because it will cook any dinner and not heat the room. No heat, no smell, no smoke, no coal to bring in, no ashes to carry out. It does away with the drudgery of cooking, and makes it a pleasure. Women with the light touch for pastry especially appreciate it, because they can immediately have a quick fire, simply by turning a handle. No half-hour preparation. It not only is less trouble than coal, but it costs less. Absolutely no smell, no smoke, and it doesn't heat the kitchen.

The nickel finish, with the turquoise blue of the enameled chimneys, makes the stove ornamental and attractive. Made with 1, 2 and 3 burners; the 2 and 3-burner stoves can be had with or without Cabinet.

Every dealer everywhere; if not at yours, write for Descriptive Circular to the nearest agency of the

J. S. Laupus, Jeweler

PERSONAL.

Clarence Turmail, of Vallonia, was here today.

Dr. Wilson, of Brownstown, was in Seymour today.

W. M. Isaacs, of Brownstown, transacted business here today.

Jerry McOsler, of Brownstown, was here on business today.

Wilbur Pfaffenberger was a passenger to Columbus this morning.

Henry Smith, of Sulphur Springs, was here on business today.

C. F. Williams, of Madison, was in this city Wednesday evening.

Harry J. Martin has returned from a short business trip to Franklin.

Mrs. Harmon Moritz is visiting her son, Carl H. Moritz, of Columbus.

Miss Louise Murphy was a passenger to North Vernon this morning.

Clyde J. Roach was here from Indianapolis this morning on business.

Claud Swengel was here from near Reddington this morning on business.

Henry Kattman was here from Brownstown a short time this morning.

Joseph M. Rober'son was here from Brownstown a short time this morning.

John R. Tindler, county clerk, was here from Brownstown this morning on business.

Rev. Samuel Hobson, of Aeme, was in the city Wednesday afternoon on business.

Mrs. J. M. Shields and daughter, Miss Mabel, were passengers to Indianapolis this morning.

Mr. and Mrs. Earl Cox will leave tonight for Zanesville, Ohio, to put on an entertainment.

Mr. and Mrs. L. W. Jones will leave for Terre Haute tomorrow for a three weeks' visit with relatives.

Mrs. Ethel Braskett and Miss Della Lubker came up from Vallonia to attend the circus and visit friends.

Mrs. Louis Farrell is here from Greenwood, the guest of her sister, Mrs. Zelma Leas, the East Second street milliner.

Albert Luedtke came up from Sparks-ville this morning to spend the day among his friends and in see the circus.

James C. Love, of San Bernardino, Cal., whose home was formerly in this city, is in the city the guest of relatives.

John Middendorf and William Middendorf, of near Jonesville, were in the city this morning to see the circus parade.

Misses Erma Heuser and Leota Wieneke went to Lawrenceburg this morning to spend several days with relatives and friends.

Hal Branaman returned home from Brownstown early this morning, where he has been spending several days with relatives and friends.

Superintendent Fitzgibbon, of the Columbus public schools, was in the city this morning en route from a visit with relatives west of here.

Paul A. Smith, of Aurora, was here yesterday transacting business with the Ahlbrand Carriage company. He also visited his sister, Mrs. Richard Temple.

William Reynolds and Miss Anna Reynolds came up from Tappelo this morning to see the circus and spend the day with their brother, W. H. Reynolds, and family.

Mrs. Harry French returned to her home at Aurora yesterday, after a visit here with her parents, Mr. and Mrs. Joseph Hirtzel, of East Second street, and other relatives.

Mrs. Boone, of Chicago, who has been here the past week on a visit with her son, Engineer Mel Boone, and other relatives, went to Louisville this morning to visit her son, who resides there.

Mrs. Boone is past ninety years of age and is surprisingly active.

Dr. and Mrs. D. J. Cummings, of Medora, left Tuesday for Jeffersonville, Ia., by way of Chicago, where they will spend several days. Other long distance passengers over the Pennsylvania included one to Ft. Myers, Fla. and two to Decatur, Ill., this morning.

M. F. Everback went to Indianapolis this morning to spend some time with his daughter, Mrs. George Atkinson, and family, after spending a few days here with relatives. He had recently returned from a three weeks' visit with relatives at Madison, Louisville and New Albany.

HEAVY DOCKET.

[Continued from First Page.]

estate of Lee Stigers, deceased, vs. the B. & O. S.W. R. R. Co., damages; demand, \$10,000. On the 19th day of May 1908, Lee Stigers, who was employed by the defendant was killed near Milan, by being caught under an engine which jumped the track and turned over. The complaint alleges that the wheels of the engine were badly worn and that the axle was bent and out of line, which caused it to jump the track.

Among the cases disposed of are:

Emma Jones vs. Frank Jones; divorce granted plaintiff.

Oliver Fleetwood, et al, v. Mirtie E. Harrison, et al; partition of real estate made.

Mary Rush vs. Elva Pollock, et al; partition of real estate made.

Dickinson Trust Co., trustees, vs. Sylvester Wilson, et al, foreclosure of mortgage, dismissed.

Ethel Hawn vs. Frank Hawn; divorce granted plaintiff.

Cooking by Electricity.

With the very best cook stoves more than 90 per cent. of the heat energy of the coal either escapes up the chimney or makes the kitchen insufferably hot; only from 4 to 7 per cent. of the heat, is actually used in cooking. Electricity is an ideal source of heat, as there is absolutely no loss in the change from electricity to heat. It seems practically certain that our coal supply is limited, too costly, and that new and better ways of obtaining the heat so necessary for our lives and comfort will be found in the year yet to come. Steinmetz, the genius of the General Electric Company, says that unless some such discovery is made before many years the water powers will have to be harnessed to secure electrical energy, and this energy transmitted to various points and turned into heat.

Electric heat can be had on the instant, for electricity travels at the rate of 186,000 miles a second, and in any degree desired, from a warmth that is barely perceptible to the touch to the carbon-melting heat of the electric furnace in which platinum, diamonds and firebrick itself melt and run like water. Electric heat can be carried anywhere about a building and applied just where wanted without serious loss through radiation. Consequently the electric kitchen and the "wooden range" can be operated all day long to cook and bake without raising the temperature of the kitchen to any considerable degree.

MY DOCTOR MIGHTY FINE

Mrs. Hattie Cain of Carrsville
Thinks all the More of Her
Doctor Since He Advised
Her to Take Cardui.

Carrsville, Ky.—"My doctor," writes Mrs. Hattie Cain, "who advised me to take Cardui, for my troubles, is a mighty fine doctor, and I say God bless Cardui and the people who make it."

"Before I took Cardui, I suffered with female troubles for sixteen years. I would have to send for a doctor every three months, and oh! how dreadfully I suffered!"

"I would cramp and have convulsions and it looked like I would die. At last I took Cardui and oh! what a surprise! I found it was the medicine for me!"

"From the first bottle, I began to mend and now I am well, can do more work, can walk and go where I please and it doesn't hurt me, and I owe it all to Cardui."

Cardui helps sick women back to health. It has been doing this for over 50 years. It is not a laxative, or a heart or kidney medicine—it is a woman's medicine.

If you are a woman, try it.

N. B.—Write to: Ladies' Advisory Dept., Chattanooga Medicine Co., Chattanooga, Tenn., for Special Instructions, and 64-page book, "Home Treatment for Women," sent in plain wrapper, on request.

LONGVIEW.

Miss Lovell Bottorff visited friends at Seymour Saturday and Sunday.

Miss Dessa Edwards stayed in the post office one day last week.

Mrs. Mary Edwards went to Freetown one day last week.

The ball game was well attended here Sunday evening. Freetown and Clearspring played.

Miss Lucy Fleetwood made a business trip to Seymour last week.

A touch of rheumatism, or a twinge of neuralgia, whatever the trouble is, Chamberlain's Liniment drives away the pain at once and cures the complaint quickly. First application gives relief. Sold by all dealers.

BURIAL PLACE OF EDWARD VII.

Features of Albert Memorial
Chapel at Windsor Castle.

ORIGINALLY BUILT BY HENRY III.

Structure Where Body of Great Britain's Late Monarch Will Be Entombed Is Remarkable For Its Beauty and Grace—Long Known as "Wolsey's Tomb House."

The Albert Memorial chapel at Windsor castle, England, where the body of the late King Edward VII. of Great Britain will eventually be buried, was so named by Queen Victoria as a memorial to the prince consort. It was built by Henry III., who dedicated it to his favorite saint, Edward the Confessor. The building is remarkable for its beauty and grace, and a great deal of Henry III.'s work still exists in the lower section of the walls, but the upper part was rebuilt in 1501-3 by Henry VII.

Henry VIII. gave the chapel, still unfinished, to Cardinal Wolsey, and it was known as "Wolsey's tomb house" for many years. The great cardinal engaged the Florentine sculptor Benedetto to construct for him a magnificent tomb of marble and gilt bronze, with a recumbent effigy at the top. The rich bronze work of Wolsey's tomb was ripped off and melted by order of the commonwealth in 1642, the metal being sold. In 1805 the black marble sarcophagus, shorn of its bronze ornaments, was moved from Windsor and placed as a monument over Admiral Nelson's grave in St. Paul's cathedral.

Mausoleum For Royalty.

Although "Wolsey's tomb house" was roofed in and used for holding mass by James II., the stone vaulting was not completed until recent times, when the entire chapel was refitted by Sir Gilbert Scott, under command of Queen Victoria, and renamed. Its interior walls were then lined with costly marbles and the whole magnificently decorated. In this chapel are the tombs of Prince Leopold, the Duke of Albany and the Duke of Clarence, the elder brother of the present king of Great Britain, while also in the chapel is a cenotaph to the prince consort.

St. George's chapel, Windsor, where the king's body will be placed temporarily, ranks next to Westminster abbey as a mausoleum for royalty, although Edward IV. was the first of the kings of England to be buried there. He it was who built the present chapel in 1473 after razing almost to the ground the earlier chapel on the same spot, which had been completed and filled with stained glass by Edward III. in 1363.

Edward IV. left directions on his deathbed that a magnificent tomb should be erected over his body, with an effigy of himself in silver. All that now remains of this once costly monument is a part of the wrought iron grille which formerly surrounded the tomb, said to be one of the most elaborate and skillfully wrought pieces of ironwork in the world. This grille was afterward removed from the north aisle to the north side of the sanctuary.

Fine Example of Architecture.

The next king to follow Edward IV. into the mausoleum in St. George's chapel was Henry VIII., who ordered that his body should be laid beside that of Jane Seymour in a wonderful bronze and marble tomb. That tomb was never completed, and what existed of its metal work was probably melted down by the commonwealth, for no trace of it now remains. In the same vault which contains the bodies of Edward IV., Jane Seymour and Henry VIII. lie the bodies of Henry VI., Charles I., George III. and his queen, George IV., the queen of Edward IV., the Princess Charlotte, William IV. and his queen, the Duke of Kent and other members of the royal family.

The Chapel of St. George is one of the finest examples of perpendicular architecture in England and is considered finer in design than the other royal chapels, notably King's college, at Cambridge, and that of Henry VII. at Westminster. The nave of St. George was vaulted about the year 1490, but the choir groining was not completed until 1507. The hanging pendants from the fan vaulting of the choir mark a later development of style, which forms a strong contrast with the severer lines of the earlier nave vault.

Barge Built of Concrete.

It will astonish most people to learn that a boat built of concrete will not only float, but has a greater carrying capacity, is more durable and even lighter than a strongly constructed wooden boat. The Panama canal commission recently launched on the canal a big barge built of re-enforced concrete, which weighs 60,000 pounds, and two others will soon be finished. These vessels, it is said, are unaffected by sea worms, marine vegetation does not adhere to them, and they are practically indestructible.

King Edward Street in Paris.

The municipal council of Paris has decided to name one of the leading streets after King Edward.

VALLONIA.

Farm work is very backward owing to the cold wet weather.

James Loudermilk and family moved from Seymour to our town last week. He is driving a log team for Frank Dorsey.

Miss Nellie Hornaday started last Thursday for New Mexico to visit her brother, Ben Hornaday.

Work began on Wm. Peter's new brick residence last week. Henry Geyer has the contract.

Mrs. Charles Lockwood, of Washington county, who has been visiting friends in Bedford, came up on No. 4 Monday on her way home.

Miss Ida Hazzard who has been in very poor health for some time, died at the home of her parents, Mr. and Mrs. Jack Hazzard, Sunday, May 15. We join her many friends in our sincere sympathy for the family.

Miss Zella Winslow, of Champaign, Ill., came in on No. 7 Monday for a short visit with friends here and other places.

Frank Supplee is remodeling his property recently purchased from Mrs. Ewing and will convert it into a blacksmith shop. He will also install a gasoline engine and a planing machine and ban saw in connection with his shop.

Eli Lumley, of Washington county, was in town Monday.

Mr. and Mrs. Wm. Welch, of Brownstown, came down Monday for a short visit with the latter's parents, Mr. and Mrs. Wm. Empson.

Walter Conrad who has been working at New Castle for some time, came home for a short visit and left Monday morning for Granite City, Ill.

Memorial Day is drawing near and preparations are being completed for its proper observance. A memorial sermon will be preached at Brownstown Sunday, May 29th, at 10:30 a. m. and at Vallonia at 2:30 p. m. Rev. Dr. Wm. H. Hickman, of Jamestown, N. Y. He will also deliver the Memorial address at Brownstown May 30th. Mr. Hickman is a very able speaker and well worthy of hearing. He is a veteran of the civil war, having served through the war in Co. K, 39th Ind. Inf. and Co. K, 8th Ind. Cav., altogether, almost four years. Let every one turn out on those two days.

LEESVILLE.

Dan Hunsucker, of Sparksville was a business caller here Monday.

George Wray and Miss Emma Wilder, of Bedford, visited Creed Douglass and wife Tuesday.

Fred Dadds received his new auto Monday at Bedford and brought it home the same day.

Emma Speers, the fourteen year old daughter of Mr. and Mrs. Walter Speers died Wednesday night of measles. The deceased was buried at Fairview cemetery Thursday afternoon. Her mother and sister are very low with measles and fever.

Dr. Thomas Thompson returned home from Illinois Friday after a two weeks stay with his daughter. Dr. Thompson is grandpa now.

Joe Hutchinson attended the burial of Samuel Wray at Liberty cemetery Thursday afternoon.

Stanley Clark and wife visited Mr. and Mrs. C. T. Douglass Wednesday evening. Virgil Thurman, of Salem, came Saturday to visit his father and sister.

Creed Douglass went to Richmond Saturday morning.

Joe Hutchinson delivered six shoats to Frank Holland Friday morning at \$10 a hundred.

G. A. Rehstines and Walter Land, of Richmond, came Sunday afternoon with Creed Douglass with Mr. Douglass' new auto, having run it through. Mr. Land will remain several days to teach Mr. Douglass to run his car.

Dr. S. W. Smith and wife, Mrs. Cynthia Holland and W. D. McHargue and wife spend Sunday the guest of R. D. Thompson and family.

INBUILT

That Is One Secret Of The
Success Of This Typewriter

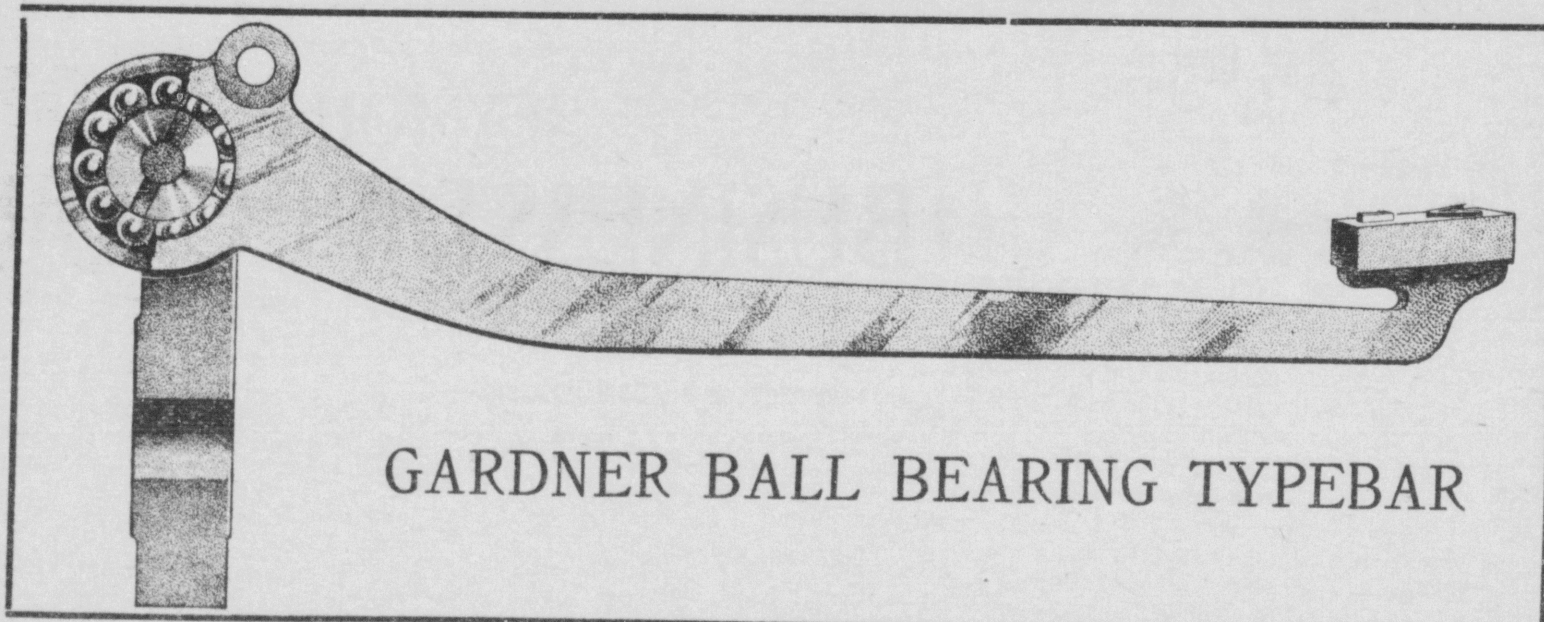

Necessary devices which with other typewriters are attached (at an extra price) or else built as parts of a "special" machine with only one use, at a more exorbitant price, are inbuilt in every NEW MODEL

L. C. Smith & Bros. Typewriter

All the Writing Always in Sight

SOME INBUILT FEATURES:—Card Writing, Decimal Tabulating, Condensed Billing, Color Work and Stenciling. All these kinds of work—and others—done by one simple typewriter, our regular correspondence machine, without any extra cost in attachments.

GARDNER BALL BEARING TYPEBAR

BALL BEARINGS—Throughout—typebar, carriage, segment, all important frictional points made anti-frictional. The inbuilt devices save you the price of attachments (costly things these attachments) the ball bearings save work and wear.

And this complete machine costs no more than others which must have expensive attachments to make them complete. To buy a typewriter without investigating the L. C. SMITH & BROS. would be like buying silver without looking for the "Sterling" mark.

The committee has engaged the Medora Military Band to play at the celebration of Fourth of July at Smith's Grove. The band has new uniforms of the most up-to-date styles and their music would do credit to any community.

Born to Alva Sutherland and wife Monday, a boy.

Born to Jessie Pray and wife Saturday night, a boy.

Biliousness and Constipation.

For years I was troubled with biliousness and constipation, which made life miserable for me. My appetite failed me. I lost my usual force and vitality. Pepsin preparations and cathartics only made matters worse. I do not know where I should have been today had I not tried Chamberlain's Stomach and Liver Tablets. The tablets relieve the ill feeling at once, strengthen the digestive functions, purify the stomach, liver and blood, helping the system to do its work naturally.—MRS. ROSA POTTS, Birmingham, Ala. These tablets are for sale by all dealers.

An Expert's Opinion Of Skin Diseases.

A prominent national expert on skin diseases whose name you are familiar with says that in all his scientific experience he has never found so hard a disease to conquer as Eczema. Yet he does not hesitate to recommend ZEMO as a most successful remedy for the treatment of Eczema, itching skin diseases, dandruff, pimples, blackheads and all other diseases of the skin and scalp. He says that not only do its curative qualities make it popular but also the fact that it is a clean, liquid remedy for external use. A great improvement over the old style greasy salves and lotions which are not only unpleasant to use but do not destroy the germ life that causes the disease. ZEMO draws the germs to the surface and destroys them, leaving the skin clear and healthy. Can be used freely on infants. Mr. A. J. Pellens will gladly supply those who call with a free sample bottle of ZEMO and a booklet that explains in simple language all about skin diseases and how to cure yourself at home with ZEMO.

SULPHUR SPRINGS.

Attendance at Sunday School 25, collection 29 cents.

Miss Crete Pierson was shopping in Seymour Friday.

Henry Smith made a business trip to West Reddington Saturday.

A. M. Brown sold a fine lot of hogs to R. R. Short last week.

Mr. Russell, of Seymour, was in our neighborhood last week in the interest of the Ohio Farmers Insurance Co.

Henry Smith has purchased a fine registered Poland China pig from Shelby county.

George A. Montgomery the milk man, has purchased two more cows lately.

On account of being detained long in Kentucky than was expected, our pastor, Rev. J. S. Arvin, could not be with us last Sunday but there will be preaching next Sunday and Sunday night instead.

Sherman Hall and wife, of Azalia, Amos Ebaugh and wife and F. M. DeMundrum, of Flemings, were here to attend church Sunday.

Mrs. Chas. Rocky, of Jennings county, visited with her daughter part of last week and attended church meeting Saturday.

Mr. and Mrs. Ed Perkinson, of Seymour, visited the latter's parents, Mr. and Mrs. John W. Briners Sunday.

Emma, Alma and Alice Krueger visited with Alex Guffy's Sunday.

Claud Swengel and wife, of Reddington, drove down to A. M. Brown's Sunday night.

Misses Nannie and Mary Brown, of Indianapolis arrived Sunday evening to remain until after the township commencement.

WEST REDDINGTON.

George Hancock, of Seymour, was a business caller here one day last week.

Mr. and Mrs. Andy Larrison and children spent Saturday night and Sunday

with her parents at Peter's Switch.

Sam Moore sold a cow to J. E. Wetzel last week for \$60.

Maud Van Riper left last Monday for Washington, D. C., to attend the International Sunday School convention. She expects to visit some other Eastern cities.

Eczema—A Germ Disease Can Now Be Cured.

The Medical profession is all agreed that ECZEMA is a germ disease, but the thing that has baffled them is to find some remedy that will get to the germ and destroy them.

Zemo, the clean, external treatment has solved this difficulty by drawing the germs to the surface of the skin and destroying the germ life that causes diseases. The whole method of treatment and cure by ZEMO is explained in destroying the germ life that causes the disease by the makers of ZEMO. It tells how to cure yourself at home of Eczema, Blackheads, Pimples, Dandruff, and all diseases of the skin and scalp. Call at A. J. Pellens' Drug Store for Booklet and learn more about this clean, simple remedy that is now recognized the treatment for all diseases of the skin and scalp.

SURPRISE.

Miss Mary Copeland, of West Reddington, attended church at Surprise Sunday.

Miss Hulda Anderson, after a pleasant six days' visit with relatives at Reddington, returned home Saturday.

John M. Anderson had a fine young mule to die Saturday.

GENERAL OFFICES,
Scottsburg, Indiana.

FINLEY P. MOUNT

Named by Indiana Republicans
For Attorney General.PAYS RESPECTS TO
CIVIC FEDERATION

President of Manufacturers' Association Speaks Plainly.

New York, May 19.—Before the National Manufacturers' association closed its convention at the Waldorf-Astoria last evening, President John Kirby, jr., who had just been re-elected, paid his respects to the Civic Federation in the direct language he is accustomed to use. He was congratulating the Manufacturers' association on its usefulness and success, and he added: "When we consider that the American Federation of Labor, with the Civic Federation behind it, has all it can do to hold its own, we ought to feel that we have accomplished something in reaching a point where we can at least have some liberty in the management of our affairs."

Mr. Kirby said that he did not want to hurt the feelings of any member of the Civic Federation who might be present, but that his words must stand, as they expressed what he believed. He declared the Civic Federation was the chief asset of the Federation of Labor.

The association adopted resolutions recommending the establishment of permanent residences for American ambassadors abroad, and approving the activities of the Peace Society. In a long detailed series of resolutions of industrial indemnity insurance which was adopted were these: "That an equitable, voluntarily mutually contributory indemnity system, automatically providing indemnity for victims of industrial accidents and their dependents, is required to reduce waste, litigation and friction and to meet other requirements of an enlightened industrial nation."

"That we recommend to your members the inauguration with the least possible delay of a system of voluntary, mutually contributory industrial accident indemnity insurance, this system to be elastic enough to provide for voluntary contributory sickness, old age and death insurance, if later deemed advisable."

The resolutions also authorized the president and directors to arrange for the establishment of such a plan and provided for the establishment of a department for the prevention of industrial accidents.

TERSE TELEGRAMS

The French minister of marine has ordered all French warships to display their flags at half-mast on the day of King Edward's funeral.

Among the wreaths sent to Windsor for King Edward's bier was one of palm leaves and orchids, with a silk American flag, from President Taft.

Speaker Cannon is quoted as predicting that congress will not adjourn until July 15 at the earliest, and possibly will remain in session until Aug. 1.

John A. Kasson of Iowa, statesman and publicist, is dead at his residence in Washington. Mr. Kasson had spent practically his entire life in the government service.

It is stated that King George of Greece will shortly go to Rome to try to induce the Italian government to take the initiative in securing a definite settlement of the Cretan question.

A body found in the Indiana Harbor canal has been identified as that of Michael Haus of Hammond, who disappeared two months ago. Marks on the head create suspicion of foul play.

Because she was refused permission to go to Birmingham, a ten-year-old negro employed by a wealthy planter at Demopolis, Ala., as a nurse for his two small children, gave dog poison to them. The youngest, aged three months, died in agony, and the other's condition is serious.

CUBA FEARS
REVOLUTIONBlowing Up of Barracks the
First Overt Act.

A HUNDRED SOLDIERS KILLED

Three Thousand Pounds of Dynamite at Barracks at Pinar del Rio Let Go With Awful Consequences—Government Insists Explosion Was an Accident, but Suspicion Points Toward Revolutionists.

Havana, May 19.—At 3 o'clock Wednesday afternoon the barracks of the rural guards at Pinar del Rio were blown up and 100 persons were killed. Owing to the race disturbances the dynamite being used on the various public works in that section had been collected and stored in the barracks, the quantity there being 3,000 pounds. Orders had been given for the removal of the dynamite to the regular powder magazines, and the government reports state that the explosion occurred while this was being done. However, as Wednesday was the day fixed by the negro conspirators for an uprising, the earth's entering the tail of the comet to be the signal for the beginning of the revolution, many entertain the belief that the explosion was the first overt act of the revolutionists.

Several special trains carrying troops were at once rushed from Havana to Pinar del Rio. General Montecaguda, commander of the rurales, and several officials accompanied the troops. The barracks, in which were quartered the rurales, a number of public works employees and offices were completely destroyed. Commandant Ravenna, with all his family, and the families of other officers are among the killed. A corporal of rurales is the only survivor.

Many buildings in the vicinity of the barracks were wrecked. There is the most intense excitement, both at Pinar del Rio and Havana, everyone remembering the abortive attempt to start a revolution some time ago by murdering the sleeping rurales in their barracks at Guanabacoa, a few miles from Havana, which atrocity the late Senator Morua Delgado instigated. The negro uprising, which Senor Estenos, who is now in jail awaiting trial, is alleged to have been planning, was, it is said, arranged to start simultaneously in Pinar del Rio and Santiago provinces on the night of May 18.

The government insists that the explosion was an accident, but meanwhile it is rushing troops to Pinar del Rio.

THE RAILWAY BILL

Senate Has Disposed of Another Important Feature.

Washington, May 19.—The senate has disposed of another important feature of the railway bill. By a vote of 40 to 23 the provision of the bill which gives the attorney general charge of the defense of orders of the interstate commerce commission when they are attacked in the courts was adopted. Another amendment was agreed to without opposition which extends the period during which the interstate commerce commission may suspend the operation of a rate, charge, classification or regulation filed with the commission by a common carrier, from 60 to 120 days.

The first international congress on aerial navigation is in session at Paris.

THOMAS HONAN

Named by Indiana Democrats
For Attorney General.DIDN'T TAKE JURY
LONG TO ACQUITPittsburg Millionaire Freed of
Graft Charge.

Pittsburg, May 19.—It required the jury but five minutes to acquit Frank F. Nicola, Pittsburg business man, who for the past three days has been on trial charged with lending assistance to the bribing of Pittsburg councilmen. The jury accented the verdict by placing all costs on the county. The official charge against Nicola was "accessory before the fact to bribery."

Instead of proving the bribery end of the case the commonwealth's own witnesses gave testimony tending to prove that Nicola tried to discourage all those who were having anything to do with obtaining city deposits when he found evidences of crookedness.

Nicola's friends made a demonstration when the verdict came in and he was cheered on the streets. On reaching his office Nicola found a bunch of American Beauties from his wife, who had sent them while he was in court, strong in her belief that he would be acquitted. Nicola, who is worth \$20,000,000, broke down at this tribute.

IN MOTHER'S DEFENSE

Lafayette Boy Opens Fire Upon His Drunken Stepfather.

Lafayette, Ind., May 19.—Thomas F. Manley, proprietor of a cigar store and poolroom in this city, was shot twice in the left hip by his stepson, Francis Seeger, at the Manley home, the shooting being done in defense of the boy's mother. Francis is a son by a former marriage, his mother having married Manley about six years ago. Since that time Mr. and Mrs. Manley have been divorced and remarried.

According to the police Manley went to his home in an intoxicated condition and threatened to strike his wife, when the boy picked up a revolver and opened fire on his stepfather. Three shots were fired, two taking effect. Manley was taken to the St. Elizabeth hospital, where his condition is serious.

Young Seeger is a member of the boys' choir at St. Mary's church, and is widely known as a soloist.

Expecting a Great Crowd.

Terre Haute, Ind., May 19.—Terre Haute is putting on its bright colors for the thirty-first annual encampment of the Grand Army of the Republic, department of Indiana, to be held next week. At headquarters reports as to details of arrangements are satisfactory. It is expected that 100,000 persons will come to the city.
